Electrochemistry  
Class Starter for Lesson 7

If  $\text{KMnO}_4$  and  $\text{Fe}(\text{NO}_3)_2$  react in the presence of sulfuric acid ( $\text{H}_2\text{SO}_4$ ),  $\text{Mn}(\text{NO}_3)_2$  and  $\text{Fe}_2(\text{SO}_4)_3$  are formed.

Write the **dissociation equation** for  $\text{KMnO}_4$ :

Write the **dissociation equation** for  $\text{Fe}(\text{NO}_3)_2$

Write the **dissociation equation** for  $\text{Mn}(\text{NO}_3)_2$

Write the **dissociation equation** for  $\text{Fe}_2(\text{SO}_4)_3$ :

Now balance the following **net ionic REDOX reaction** under **ACIDIC** conditions:
