Science 9 Energy Flows in one direction through Ecosystems

1. I can create a food chain, that exists in a temperate rainforest, that includes: producer, primary consumer, secondary consumer, tertiary consumer, and a decomposer:

2. I can name a herbivore, an omnivore (if there is one) and a carnivore in my food chain:

3. I can identify the percentage of energy that is lost between each trophic level:

4. I can distinguish between a food chain and a food web:

5. I can explain how the energy in an ecosystem flows:
